

THE STORY SO FAR

KYZR is Dutch brothers, producers, and multi-instrumentalists **Marcel Julius** and **Stefan Thomas**.

Between 2017 and 2019, KYZR introduced **'The 7 Adventure,'** a project comprising 7 songs accompanied by 7 hand-drawn OneMinuteVideos. This narrative unfolds a timeless story of a boy and a girl in the modern era.

Their next step came with the release of 'What It Means,' featuring **Erik Frisberg** as their singer and vocal lines co-writer. This caught the attention of numerous radio stations and the music received promising reviews worldwide. The debut album was mixed by Blake Eiseman (Florida/US, a.o. Usher, Arrested Development) and mastered by Colin Leonard (Atlanta/US, a.o. Kimbra, Paul McCartney)

In the spring of 2019, their music piqued the interest of DWD Studios in the UK, leading to a signing with the prominent sync label **De Wolfe Music USA**.

In 2020, KYZR engaged in collaborative remix projects, which culminated in the **'Night Adventures'** playlist.

While facing significant family challenges, the brothers discovered a renewed inspiration for songwriting between 2019 and 2023. As a result, their new songs exhibit a more timeless quality, infused with elements of rock, seventies pop, and cinematic influences, expanding their artistic palette.

Their enduring partnership with singer-co writer Frisberg ensures that the music remains unmistakably KYZR.

Further collaborations with musicians from California/US evolved during the process of writing the second album: bass player **Whynot Jansveld** (Wallflowers, Richard Marx), trumpet player **John Fumo** (James Brown, Crosby, Stills, Nash & Young), mix engineer **Brendan Dekora** (Foo Fighters, Muse), and **Maor Appelbaum** (Faith No More, Yes).

Now, the brothers have laid the groundwork for their next chapter: This second album, **'Beauty Comes Crashing Down'** was released on Valentine's Day, 2024. Simultaneously with the release of the album, its first single sees the light of day: **'This Time It's Real'**.
